Employment History

- **Associate Software Engineer**

Veltron Sysmatic Solutions Pvt Ltd

9/1/2024 - Present

Work on Salesforce CRM development and data analysis, building custom objects, Apex triggers, and SOQL queries to support business reporting needs. Analyze Salesforce and business data using SQL and Excel to identify trends and generate insights for stakeholders and leadership. Build and maintain Salesforce reports and dashboards to track key CRM metrics, improving visibility into sales, leads, and customer data. Automate routine CRM processes using Salesforce Flows, reducing manual data entry and improving data accuracy across records. Collaborate with cross-functional teams to gather requirements and translate them into scalable Salesforce and data analytics solutions

- **Assistant Co-Ordinator**

Greens Technologies

9/1/2023 - 8/1/2024

Coordinated manpower deployment for 15+ trainers and support staff, managing allocation, utilization, and conflict resolution. Handled payment coordination, tracking, and reconciliation with zero leakage and accurate documentation. Tracked operational progress using MS Excel and prepared daily/weekly performance and utilization reports

Position Requirements

Job Description

Our environment includes an existing production POS, voucher, telecom recharge and payment system. The developer must be capable of understanding and maintaining the existing legacy system while also developing newer backend integrations.

Core Environment

C#

.NET Framework / ASP.NET

Microsoft SQL Server

T-SQL

IIS / Windows Server

REST APIs, HTTP and JSON

Legacy ASMX Web Services

SOAP, XML and WSDL

Third-party API integrations

Visual Studio

Git

Postman / SoapUI

POS and voucher/recharge transaction systems

The existing architecture includes flows such as:

POS ' .NET Backend/API ' SQL Server ' Telecom/Payment Provider API ' Response ' Database/POS

The developer may need to understand old C# projects, troubleshoot production transactions, work with SQL databases and stored procedures, maintain existing SOAP integrations, and implement new REST APIs.

Mandatory Requirements

1–4 years of relevant .NET/backend development experience

Strong C# fundamentals

.NET Framework / ASP.NET experience

Strong Microsoft SQL Server knowledge

Good T-SQL skills

Joins, transactions, indexes and stored procedures

REST API integration

HTTP, JSON and API authentication

Visual Studio

Basic IIS knowledge

Debugging and troubleshooting ability

Ability to understand and modify an existing codebase

Preferred Skills

ASMX Web Services

SOAP / XML / WSDL

ASP.NET Core / modern .NET

Advanced SQL Server troubleshooting and optimization

Windows Server

SoapUI

Telecom/recharge systems

POS systems

Payment integrations

Third-party API integrations

Legacy-system modernization
