Employment History

- **Dotnet Backend Developer**

Vectorilo ITech Solutions

9/1/2025 - Present

Developed backend functionalities for a real-time ERP application used by construction companies. Built and maintained RESTful APIs using ASP.NET Core. Implemented business logic for modules such as employee management, workflow processes, and project tracking. Integrated My SQL database and optimized queries for better performance. Collaborated with frontend developers for seamless API integration. Implemented authentication and authorization mechanisms for secure system access. Fixed bugs and handled production issues to ensure application stability. Participated in requirement analysis and feature enhancements

Position Requirements

Job Description

Our environment includes an existing production POS, voucher, telecom recharge and payment system. The developer must be capable of understanding and maintaining the existing legacy system while also developing newer backend integrations.

Core Environment

C#

.NET Framework / ASP.NET

Microsoft SQL Server

T-SQL

IIS / Windows Server

REST APIs, HTTP and JSON

Legacy ASMX Web Services

SOAP, XML and WSDL

Third-party API integrations

Visual Studio

Git

Postman / SoapUI

POS and voucher/recharge transaction systems

The existing architecture includes flows such as:

POS ' .NET Backend/API ' SQL Server ' Telecom/Payment Provider API ' Response ' Database/POS

The developer may need to understand old C# projects, troubleshoot production transactions, work with SQL databases and stored procedures, maintain existing SOAP integrations, and implement new REST APIs.

Mandatory Requirements

1–4 years of relevant .NET/backend development experience

Strong C# fundamentals

.NET Framework / ASP.NET experience

Strong Microsoft SQL Server knowledge

Good T-SQL skills

Joins, transactions, indexes and stored procedures

REST API integration
HTTP, JSON and API authentication
Visual Studio
Basic IIS knowledge
Debugging and troubleshooting ability
Ability to understand and modify an existing codebase
Preferred Skills
ASMX Web Services
SOAP / XML / WSDL
ASP.NET Core / modern .NET
Advanced SQL Server troubleshooting and optimization
Windows Server
SoapUI
Telecom/recharge systems
POS systems
Payment integrations
Third-party API integrations
Legacy-system modernization
