Employment History

- **Software Engineer**

Future Soft India Pvt Ltd.

2/1/2025 - Present

Developed and maintained scalable backend services and enterprise APIs for transaction-driven applications. Built secure multi-role dashboards (Admin, Vendor, Dealer) with RBAC and JWT authentication. Improved CMS page-speed performance by 40% through optimized API batching, caching layers, and reduced blocking operations. Analyzed backend and database performance issues and optimized queries, API processing, and data-access operations, improving API response time by approximately 25%. Designed and implemented database-driven business logic using SQL, relational database concepts, transactions, and optimized data-access layers. Integrated third-party APIs for payment, notification, and external business services

- **Software Engineer**

Webkul Pvt Ltd.

12/1/2023 - 12/1/2024

Developed backend functionality for product catalog, customer accounts, shopping cart, checkout, order management, and marketplace operations. Built REST APIs supporting product, customer, order, seller, and administration workflows. Built and integrated an AI-powered chatbot solution, optimizing response latency. Delivered a Progressive Web App (PWA) using Vue.js for a mobile-like user experience, optimizing rendering and bundle size. Integrated payment gateways and shipping APIs with transaction status handling and error recovery. Implemented multi-vendor business workflows supporting seller onboarding, product management, commissions, and order fulfillment

- **Associate Software Engineer**

E-Value Web Solution

11/1/2021 - 12/1/2023

Developed an enterprise ERP and CRM platform for managing business operations, employees, customers, finance, inventory, and internal workflows. Integrated third-party APIs for authentication, payments, and communication across enterprise workflows. Improved backend communication through optimized data handling, reducing response times by ~20%

Position Requirements

Job Description

Our environment includes an existing production POS, voucher, telecom recharge and payment system. The developer must be capable of understanding and maintaining the existing legacy system while also developing newer backend integrations.

Core Environment

C#

.NET Framework / ASP.NET

Microsoft SQL Server

T-SQL

IIS / Windows Server

REST APIs, HTTP and JSON

Legacy ASMX Web Services

SOAP, XML and WSDL

Third-party API integrations

Visual Studio

Git

Postman / SoapUI

POS and voucher/recharge transaction systems

The existing architecture includes flows such as:

POS ' .NET Backend/API ' SQL Server ' Telecom/Payment Provider API ' Response ' Database/POS

The developer may need to understand old C# projects, troubleshoot production transactions, work with SQL databases and stored procedures, maintain existing SOAP integrations, and implement new REST APIs.

Mandatory Requirements

1–4 years of relevant .NET/backend development experience

Strong C# fundamentals

.NET Framework / ASP.NET experience

Strong Microsoft SQL Server knowledge

Good T-SQL skills

Joins, transactions, indexes and stored procedures

REST API integration

HTTP, JSON and API authentication

Visual Studio

Basic IIS knowledge

Debugging and troubleshooting ability

Ability to understand and modify an existing codebase

Preferred Skills

ASMX Web Services

SOAP / XML / WSDL

ASP.NET Core / modern .NET

Advanced SQL Server troubleshooting and optimization

Windows Server

SoapUI

Telecom/recharge systems

POS systems

Payment integrations

Third-party API integrations

Legacy-system modernization
